Fujitsubo Evolution VIII RM01A Cat Back Exhaust

Model : FJ 190-32055

Manufacturer : Fujitsubo

RM01A was originally developed for racecars. It's a lightweight muffler with high efficient exhaust. Moreover, by changing its raw materials and construction, the weight of RM-01A has become approximately 50% lighter compared with a regular silencer which, as a result, significantly increases acceleration. The capacity of silencer and the thickness of its main pipe are reviewed in addition to adopt the lightweight bracket & flange. Its Lightweight construction keeps efficiency, while maintaining its sporty intensity. Main Pipe & Main Silencer It uses 1.0 / 1.2mm SUS304 stainless steel. This provides the exhaust with is lightweight properties and great strength. By selecting the best wall thickness of the material, this gives the exhaust what is necessary for genuine high performance design. These exhausts are a single piece. This is to reduce the extra weight from flanges. The quality of these exhaust are excellent. Shipping charges are very high because of this one peice design.
