TurboXS Fuel Cut Defender 5V Sensors

Model : TXS FCD

Manufacturer : TurboXS

Finally a fuel cut defender that you don't have to hit fuel cut to adjust. Completely universal, this device allows you to raise your over-boost fuel cut so you can boost to your hearts content. While many devices completely eliminate the boost cut, the TurboXS FCD allows you to raise the fuel cut limit but still have an over-boost setting.

Simple 4 wire installation gets you up and running in no time. This is a great compliment to one of TurboXS's boost controllers. Warning: When raising boost pressure, make sure you have a boost gauge, the boost level you set is within the mechanical limits of your components and you have tuned your vehicle appropriately!!!!
