Cusco LSD RS 1.5 Way Impreza Rear STi 2004-2008 GDB

Model : CUS LSD 182 L15

Manufacturer : Cusco

Featuring high tension chrome molybdenum steel housing and gears the Cusco LSD is up for the task of serious competition. With large oil windows for increased flow and Cusco's original groove cut technology for improved efficiency on the clutch plates, stability and longevity is promoted. -----
The 1.5-way Type RS utilizes coil springs located between the pressure rings to develop initial torque and features full engagement during acceleration and partially under deceleration. The use of coil springs rather than cone plates help promote faster, smoother engagement, along with higher durability.

2004-2008 STi 6SPD rear

Can be Converted to a 2 Way LSD!
