Whiteline WRX Rear Endlinks

Model : WTL KLC26

Manufacturer : Whiteline

These kits utilise a high strength alloy link fitted with ultra low compliance polyurethane bushes. Critical hardware is replaced with high tensile components to match the higher loads. The result is much more precise and direct roll control with up to 25% more effective bar rate available at lower wheel deflection points. This does not always mean an outright increase in your bar rate but rather a quickening of its effect allowing more bar rate earlier. Link shape and bush mounts are designed to allow maximum sway bar articulation to ensure full suspension travel while acting more directly under vertical load. Unlike other brands, standard or stock length maintains correct swaybar operation for both lowered AND standard height vehicles.

Price : \$142.07
