Cobb STi Power Package Stage 2

Model : COB 612Xx2

Manufacturer : Cobb Tuning

The COBB power package Stage 2 is the AccessPORT unit + the Stainless Steel Turbo Back Exhaust. Utilizing calibrations which take advantage of the added exhaust flow from the turbo back system, the Stage 2 setup gives a generous gains in both horsepower and torque, over Stage 1.

The COBB turbo back system is comprised of the bell-mouth downpipe, a state-of-the-art metallic substrate catalytic converter, and a 3" stainless steel straight thru catback exhaust.

This package is intended for enthusiasts who wish to mildly modify their vehicle while still maintaining a stock like appearance. The tuning takes the STi from a performer off the showroom, to a worthwhile adversary on both street and track.

Note: Modifications beyond the AccessPORT and a turbo back exhaust, in this case Stage 2, would requires the user to ProTUNE the car to create a custom map. The Stage 2 mapping is specific to the outlined modifications and the use of the map with additional performance products not part of the tuning equation would compromise reliability.

Note: For use on North American ECU's only!

ONLY AVAILABLE WITH A HIGH FLOW CAT!

Price : \$1,875.00

Availability: This product was added to our catalog on Monday 08 January, 2007
