DeatschWerks 650cc/minute 07 STi Fuel Injectors

Model : DET INJ-SUB1-650-4

Manufacturer : DeatschWerks

All of our high flow fuel injectors are built using only quality OEM cores. For the customer, this means better fitment, easier tuning, and better reliability. Each injector is machined to tolerances down to +/- 0.0001" for precise and consistent flow rates and spray pattern.

But we don't stop once the injector is produced. At DeatschWerks, every injector is tested (not just one or two from each lot). Over 40 data points are collected and analyzed on each injector to be sure our customers only receive the best end product. All of our testing is performed using our in-house New Age Technologies NA8. New Age is the choice of top racing teams like Dinan and Cosworth. It is simply the best injector flow/test bench and that is why we use it.

650cc is more than enough fuel for any VF series turbo. The perfect balance of atomization and flow rate. Best pick for a mean custom-tuned daily driven street machine. Price is for a complete set of four fuel injectors!

Old cores can be sent in to DeatschWerks for partial refund.

Price : \$369.00
