## Bell Racing Dominator Ultra Series Helmet

Model : BELL BR22xx

Manufacturer : Bell Racing

Dominator, the next generation in aerodynamic helmets, delivers stability at high-speeds in a compact, comfortable, ultra-lightweight package. Designed and tested with the involvement of racing's best drivers, it is the helmet of choice for all forms of open wheel and kart racing. Dominator's features built in trip strips, rear wicker and front spoiler combine to deliver outstanding aerodynamic performance. Bell also makes a Sprint Car version of the Dominator that does not have forehead vents or chin bar vents to prevent dust and dirt from entering the helmet.

In addition, the Dominator features our new SRV friction shield system\*. This new system has a slide mechanism that allows the driver to adjust the tension on the shield allowing for multiple opening positions. When properly adjusted and in the locked position, the SRV system helps reduce the possibility of the shield opening during an impact.
