Bell Racing M3 Pro Series Helmet

Model : BELL BR2xxx

Manufacturer : Bell Racing

M3 is a feature packed, multi-use lightweight helmet that incorporates bold European styling and superior ventilation. The M3 provides many of the features and benefits of the Ultra Series helmets at a value price.

In addition, the M3 features our new SRV friction shield system*. This new system has a slide mechanism that allows the driver to adjust the tension on the shield allowing for multiple opening positions. When properly adjusted and in the locked position, the SRV system helps reduce the possibility of the shield opening during an impact.

* Sizes 6 3/4 through 7, built after August 28, 2006, are equipped with the SRV friction shield system. Sizes 7 1/8 through 7 3/4 built after September 7, 2006, are equipped with the SRV friction shield system.
