

Cobb Tuning AccessPort V2.0 Legacy GT 2007+

Model : COB AP-SUB-003

Manufacturer : Cobb Tuning

Will Work on the '08/09 WRX (MT) and LGT 2007+ (AT, 5MT and specB), 08/09 STi.

COBB Tuning announces the immediate availability of the AccessPORT for 2009 Subaru Impreza STi, Impreza 2.5GT, Legacy GT, and Legacy GT Spec B with the Impreza WRX and Forester XT soon to follow. The AccessPORT for the 2009 Subarus is the first hand-held device available that performs an ECU reflash through the vehicle's OBDII port. Just plug it in, load the map and go! Faster!

The AccessPORT provides owners of these 2009 Subaru models the ability to unlock power hidden within the factory ECU.

Performance gains across the entire powerband can be quickly realized in the short time it takes to flash the vehicle's ECU with

the AccessPORT. No tools are required. No additional "piggy-back" hardware. No mailing the factory ECU across the country.

No vehicle downtime. No waiting, and waiting, and waiting! Just plug the AccessPORT in, flash the ECU and enjoy the thrill of

increased torque and horsepower!

Flashing the ECU is just the start of what the AccessPORT is capable of. Set the AccessPORT to Performance mode to capture

0-60MPH times, ¼ Mile times, ¼ Mile trap speeds and simulate a dynamometer. Load the Fuel Economy Map for long drives

and monitor fuel economy on the fly. Enter the ECU Settings menu to configure Flat Foot Shifting and Launch Control or adjust idle speed and timing. Switch over to Live Data and choose a gauge to monitor, such as; coolant temperature, intake

temperature, ignition advance, Mass Airflow and many more. Use the Troubleshooting mode to diagnose issues by reading the factory codes and resetting the ECU once the issues have been resolved.

The AccessPORT can be used to eliminate separation anxiety for those times you are away from your car. Protect your investment when out on the town by quickly loading the Valet map to prevent the engine from revving above 3,200 rpm. Load the Anti-Theft map when you park to make it impossible to start. And in the event the car must be returned to the stock configuration, the AccessPORT can be completely

Subaru > Legacy GT > Engine > Engine Computers > Cobb Tuning AccessPort V2.0 Legacy GT 2007+

removed and the ECU restored to its factory condition. The AccessPORT will continue to meet future tuning needs as well. Staged maps can be downloaded from the COBB Tuning website to take advantage of popular Subaru modifications. For unique configurations, ranging from mild to wild, any of the COBB Professional Tuners can custom tune each car to extract its maximum potential.

The AccessPORT from COBB Tuning is the most comprehensive hand-held ECU flashing, monitoring and managing device available for the 2009 Subaru.

Price : \$695.00

Availability: This product was added to our catalog on Friday 07 December, 2007
