

Gizzmo Phenolic Thermal Intake Gaskets EVO 8 & 9

Model : GIZ G6011

Manufacturer : Apexi

The Gizzmo Thermal Gasket is a thick Phenolic inlet manifold gasket that acts as a barrier stopping heat transferring from the engine block through into the inlet manifold. Stopping this heat transfer results in a cooler inlet charge temperature and in doing so increases engine power in much the same way an intercooler does, except this is able to benefit a turbo and non-turbo setup.

- * Produces a cooler intake manifold and intake charge resulting in MORE POWER
- * Almost invisible modification, looks stock for the stealth factor
- * Better gas mileage
- * Replaces stock gaskets
- * Reusable over and over
- * No undesirable side effects

Price : \$90.00
