Cusco 2004+ WRX 22MM Rear Sway Bar Kit

Model : CUS 666 311 BJ22 EX

Manufacturer : Cusco

Us spec cars have smaller sway bar than similar models sold elsewhere in the world. The key to making your all wheel drive car turn better comes from replacement of the rear sway bar. By increasing the diameter and leverage, more cornering force is applied to the outside wheels. Thus forcing the car to "turn-in" better. Additionally reducing sway also increases the contact patch of the rear tires. The all wheel drive system uses the additional traction to push the car better through the turns. The Cusco bar is 22mm in diameter. And is a direct fit for the WRX.

Price : ~~\$205.00~~

Sale price : \$194.75
