## Beatrush 2008 STi Radiator Shroud

Model : BRUSH S146020RP

Manufacturer : Beatrush

Keeping the proper air flow through the radiator is one of the most important things about keeping the car running for a long time. With addition of front mount intercoolers and other parts. Air flow to the radiator decreases, raising the coolant temperatures.

This part by Beatrush will allow the air to go through the radiator, instead of escaping over the top and shooting on the engine. This air will now be forced to go through the radiator helping keep the motor cool and running strong, even on the hottest days.

**Price : \$122.00**
