Injen Evo X Intake and Upper Intercooler Pipe

Model : injen SP1899P

Manufacturer : Injen

The only intake system you need in your EVO 10! Features a cast multi-stage tuned mid section for volumized airflow throughout the entire power band. Combined with the upper intercooler piping (included), the system eliminates hose expansion to increase throttle body response going into boost. Dyno proven performance, not hype! This system will work with the factory Front mount on the Evo or with almost any of the aftermarket units. The BOV flange on the upper IC pipe will fit the stock blow off valve or any aftermarket BOV that fits with the stock flange. Features- Upper Intercooler Piping- Blow off Valve recirculation- Multi-Stage Tuned intake- Completely bolt-on application
