HKS Hipermax III 2008 STi coilovers

Model : HKS 80140-AF008

Manufacturer : HKS

Tuning your vehicle's suspension is one of the easiest ways to instantly improve overall performance. The HKS Hipermax II suspension, which offers both ride height and shock dampening adjustments, provides improved handling characteristics while maintaining your vehicle's ride comfort. Ride height is adjusted by simply rotating the 60mm spring retainer perches around the chromed steel shock body. The dual interlocking spring retainer perches prevent spring movement and unwanted ride height changes. Dampening can be adjusted at 30 settings to deliver the desired shock compression and rebound stiffness for custom tailored driving characteristics. The included anodized aluminum upper Pillowball mounts retain spring placement and improve steering response and maintains suspension geometry. Additionally, some applications offer camber adjustments on the upper Pillowball mounts. Each HKS Hipermax Damper II suspension system comes with all the need adjustment wrenches, stiffness adjusting knobs, and miscellaneous hardware for a complete installation and tuning.

Features: Chromed Steel shock body assembly with precision-cut threads
 Shortened cylinder body and piston stroke
 Single tube structure with large free piston
 Single tube structure with low-pressure nitrogen gas
 Dual oil and gas chambers
 Anodized aluminum Pillowball upper mounts
 Anodized aluminum spring perches
 Dual rate progressive coil springs
 Fully rebuildable

Spring Rate: Front 6KG/MM, Rear 5 KG/MM

Price : ~~\$2,095.00~~

Sale price : \$1,948.35
