

## DriveShaft Shop Evolution VII / VIII / IX 2-Piece Driveshaft

Model : DSS MISH8

Manufacturer : Driveshaft Shop

We are proud to introduce our new 2-piece driveshaft for the Evolution VII / VIII / IX. This shaft uses an Aluminum front section with a Chromoly rear section with a specially designed hanger bearing and bracket that eliminates the violent hanger lag that occurs when power is put through the factory shaft. Our driveshaft uses 1 hanger bearing, instead of 2 on the factory shaft, and features greasable/replaceable u-joints instead of the non-serviceable type on the factory shaft. We also include an Aluminum conversion plate for the rear and all necessary hardware to make this a bolt-on affair.

**Price : \$1,199.99**

*Availability: This product was added to our catalog on Thursday 28 August, 2008*
