Cusco Evolution VIII Twin Plate Clutch Kit

Model : CUS 560 022 TP

Manufacturer : Cusco

For those that are serious about power transfer to the transmission, this Twin Plate Clutch Kit is an excellent choice. Tight manufacturing processes down to the micron with carbon rich facings offer high heat resistance up to 500hp. The self-leveling system balances equal wear on both the flywheel and transmission side of the disc to promote longer clutch life. The pull type does not require adjuster kits and allows for easy fitment.
