

Defi Blue Racer Boost Gauge (52mm)

Model : DEF DF06501

Manufacturer : Defi

Exclusive gauges for the USA which are derived from quick-responsive and high-accurate Defi analog gauges. Features include:

- Stepping motor "STEP MASTER VS-2" provides smooth operation
 - Ignition ON initiates self-luminescence gauge
 - Blue illumination using high-brightness LEDs
 - Full 270 degrees sweep dial provides ultimate visibility
 - A mounting bracket and instrument case is provided with the product
 - The red triangle of the regular position bezel can be used as a warning indicator
 - Does not require the Defi-Link Control Unit for use (Blue Racer Gauge cannot be connected to the Defi-Link System)
- Self-diagnostics function monitors both sensor disconnection and short-circuiting during startup.a) Sensor disconnection check:This function reports any in-proper connections, broken or disconnected sensor or sensor wire. The pointer will wave between 250 and 260 degrees.b) Short-circuiting check:This function indicates any short circuit on the sensor or sensor wire.The pointer will wave between 10 and 20 degrees. (See picture below)
